

Skype: Creating an Account and Logging In

Once you have downloaded Skype, you need to create an account (if you have not downloaded Skype, please see the “Skype: Downloading” help document).

The above box should come up immediately after downloading Skype. Click “Create a new account.” An internet browser will come up. Fill out the page that comes up with your personal information. Make sure to fill in anything that has to be completed. Then, you’ll want to click “I Agree” at the very bottom of the page. This means that you have accepted “Skype Terms of Use” and “Skype Privacy Statement.” If you want to view those, you can click on their links.

Yes, I have read and I accept the [Skype Terms of Use](#) and the [Skype Privacy Statement](#)

I agree - Continue

It will then highlight any required areas that you did not fill in. If you filled in all the required spaces, your account should be created!

Congratulations! You just created your Skype account!
